

# CNC MILL

## Application Kit

CNC automation is difficult. The VersaBuilt CNC Mill Application Kit for Universal Robots is easy. The VersaBuilt CNC Mill Application Kit combined with a UR-10 robot from Universal Robots is everything you need to successfully automate your CNC mill. All components of the kit are pre-assembled and designed to work together. Starting with basic hand tools, the VersaBuilt CNC Mill Application Kit can be installed in less than a day.

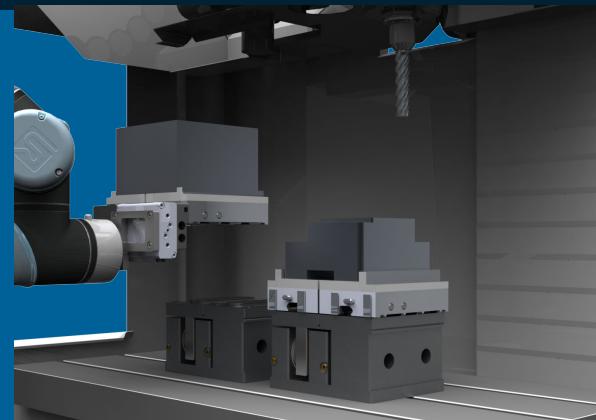

## NO ROBOT PROGRAMMING REQUIRED

The VersaBuilt CNC Mill Application Kit comes with all the software needed to automate your CNC machine. Simply install the VersaBuilt software onto the Universal Robot, run a setup wizard and you're ready for automation. Enter the part's dimensions, weight and the CNC program numbers for each milling operation and you're ready to run fully automated. Each part configuration is saved on the Universal Robot to make future automation setup fast, easy and reliable.

## OP10 + OP20 AUTOMATION

Your CNC parts require more than one milling operation. Your automation equipment should be able to deliver more than one operation. Unlike other robot grippers, VersaBuilt's patented MultiGrip gripper has multi-operation automation built-in.

# CNC MILL

## Features and Benefits

### **VersaCart 10**

Portable cart optimized for UR-10 robot.

### **Visual Infeed System**

Part alignment grid, improves operator efficiency and maximizes infeed capacity over wide range of part sizes

### **2x MultiGrip FJ Vises**

Easily automate part processing through multiple milling operations

### **MultiGrip FJ Robot Gripper**

200lb clamping force supports 10KG part payload, machine tending specific gripper

### **VersaBlast In-CNC Cleaning**

Removes chips and coolant from parts, MultiGrip vises and MultiGrip jaws after machining

### **Roboot2CNC - Mill Panel**

Pre-wired CNC control and IO panel simplifies installation, allows UR10 to control the CNC

### **VersaBuilt Mill Application Program**

No robot programming required; enter part size and CNC program number and press the start button

### **Universal Op 10 Jaws**

Machine almost any part through first operation without cutting soft jaws

### **Optional VersaDoor**

Automatic door opener for your CNC, available for single or double doors

## **WHERE TO BUY**

Contact your Universal Robots Distributor or VersaBuilt to purchase.  
[sales@versabuilt.com](mailto:sales@versabuilt.com) or (208) 906-0814

**AVAILABLE  
NOW \$17,995**

**With a 2-Year Warranty**
